kako in kam boste
shranili svoje
vzorce?

Center za trde prevleke

Institut "Jožef Stefan"

Ljubljanska 80/I, 1230 Domžale

1985–2005

Letos praznujemo 20-letnico Centra

TiN

TiAIN

V *Centru za trde prevleke* na Institutu "Jožef Stefan" se že 20 let ukvarjamo z nanašanjem PVD trdih zaščitnih prevlek na rezalna orodja, orodja za hladno in toplo preoblikovanje, ploščice iz karbidne trdine in druga orodja. V Centru imamo dve profesionalni Balzersovi napravi BAI 730 za nanos prevlek **TiN** in **CrN** pri temperaturi 450 °C. V novi CemeConovi napravi CC800 nanašamo poleg **TiN** in **CrN** tudi večkomponentne (**TiAIN**) in večplastne prevleke (npr. **TiN/TiAIN**) ter tanke plasti trdih maziv (npr. **a-C**). Največja dimenzija orodij in strojnih delov, ki jih lahko prekrijemo, je 400 mm v premeru in 400 mm v višino.

CrN

NOVO!

Večplastna struktura
TiN/TiAIN

TiAIN/a-C

Softrade Sp. z o.o.

HiQuad™

New Quadrupole Mass Spectrometer

- ▶ Modular, flexible design
- ▶ State-of-the-art interfaces, USB, Ethernet, Fieldbus
- ▶ Highest measurement speed
- ▶ Exceptional sensitivity and wide dynamic range

ThermoStar™

The perfect balance TA & MS

- ▶ Detects low concentrations of condensable/reactive gases
- ▶ Minimum contact of media with metallic parts
- ▶ No chemical reactions
