## Get the benefits of a global supplier of Vacuum Technology:

- A pioneer in the vacuum industry for over 50 years
- Full range of Diffusion, Rotary Vane and Scroll pumps
- 24 hours Service Support available worldwide
- World leader in Ion Pumps and Leak Detection technologies
- Innovative Turbomolecular pump line with controllers on board

New IDP-3 Dry Scroll Pump

# VARIAN

Dr. NoVac's space-time disruptor will be stopping the Milky Way vacuum pump in just 10 seconds. You'll have to be turbo-fast to save it, Captain Vacuum!

Time specialist Tania Turbo will assist you – with the HiPace turbopump that can be installed in any desired orientation.

Time's running out, you molecule-sucker! There's not a pump in the universe with enough power and speed to prevent it.

Tania, we and the HiPace have stabilized the vacuum far into the future. Dr. NoVac can vaporize as fast as a comet. But for now he's all tied up! Ha Ha Ha!

OH NO!!! He actually did it, that Dr. Do-It-All. And this pump will last for light-years!

Thanks to its ultra fast run-up time, the turbopump has sustained the vacuum indefinitely, setting it on a robust course to success.

TO BE CONTINUED ...

## Leading innovations. Too fast to be copied.

HiPace turbopumps: Picking up the pace in vacuum technology!

**Super-long life:** The innovative, extremely robust materials that go into the HiPace guarantee long service life.

**Super-manageable:** Their aluminum housings mean that the HiPace turbopumps are extremely lightweight and their compact design makes for a minimum footprint.

**Super-fast:** A significant reduction in run-up time assures even faster availability.

This worldwide innovation is picking up the pace in vacuum technology. It's just one more of our numerous developments aimed at getting you ahead faster.

The ingenious solution for your organization.
